Access Control Security Technician

Access Control and Surveillance Systems in your professional vocabulary? What about Audio/Visual and Paging?

Your relevant experience locksmithing and combined carpentry skills, IP addressing or port forwarding (think OSI Model), will lend themselves to transferrable skillsets in Access Control.

We're a diversified telecommunications company seeking an experienced Security Technician with a focus on Access Control who can hit the ground running once s/he joins our team. This full-time position requires approximately 95% of on-site, in-the-field time, primarily in New Hampshire and Vermont. Offering competitive wages commensurate with experience, and benefits upon eligibility, this opportunity is for an experienced professional that blends exemplary customer service with the installation and maintenance of Access Control – Surveillance Systems – A/V and Paging Systems, and associated cabling.

Your demonstrated knowledge includes technical duties in:

- The installation, inspection, maintenance, and repair of access control, IP and analog CCTV camera systems, A/V systems, and associated cabling.
- Reading and translating schematics and wiring diagrams.
- Utilizing equipment and hand tools related to systems and associated components.
- Adding to existing systems as required due to expansions or change in code.
- Accessing, updating, and programming components as applicable.
- Providing overview and training to end-users.
- Maintaining work schedules, files, logs, and other related records.
- Performing intermediate troubleshooting.
- Coordinating with complimentary disciplines such as electrical, mechanical, structural, and/or environmental.
- Documenting installations by labeling equipment and cables, recording configuration diagrams and specifications, and creating and storing database backups.
- Maintaining customer rapport by listening to and resolving or escalating concerns; answering questions.
- Performing proper installation maintaining a safe environment while balancing esthetics with appropriately anchored, structurally-sound fastening of mounted equipment and associated components.

Required Education and Experience

High school diploma or GED equivalent, 2 – 5 years of experience and ability to read and locate information on blueprints, floor plans or schematics.

Additional Desired Skills

While not necessary, lend to additional eligibility:

- Current access control, IP and analog CCTV camera systems, and/or A/V manufacturer's certification
- BICSI Certification
