## Structured Cabling Installer / Technician

Located in Hillsboro, NH, Arcomm Communications is a diversified telecommunications company that has been in business for over 35 years. Our travel footprint is primarily throughout New Hampshire and Vermont. We have a few full-time openings available with pay matching experience.

Upon eligibility, benefits include 3 group health insurance plans to choose from, paid long-term disability insurance, voluntary short-term disability insurance, voluntary dental insurance, 8 paid holidays (including a birthday floater to celebrate you!), paid sick days, paid vacation, safety shoe reimbursement, Rx safety glasses reimbursement, annual tool allowance, company logo-wear, retirement plan, breakfast/lunch-and-learn sessions, as applicable a company vehicle, and a safety-first internal culture.

Your transferrable skillsets might include familiarity with copper, voice, data, security, or fiber optic cabling, low voltage experience, carpentry skills, locksmithing, soft skills, a good work ethic, and a desire to learn more. Your tool kit may include snips/side cutters, fish sticks and fish tape, socket set, wire stripper for UTP & STP, punch down tool (110 & 66), continuity tester, COAX compression RJ crimper, multi-meter, and butt set.

Our most immediate need is for experienced Structured Cabling Installers and Technicians. For these opportunities, you:

- Install copper, voice, data, security, or fiber optic cabling in addition to installing and maintaining Optical Network Terminals (ONT).
- Terminate, troubleshoot, and test copper, voice, data, security, or fiber optic cabling.
- Document cabling installations by maintaining and completing as-built drawings.
- Maintain a safe work environment by following codes, standards, and legal regulations, as well as working safely by following all safety policies and procedures inclusive of maintaining a safe driving record.
- Update job knowledge by participating in educational opportunities; reading technical publications.

You have 1 – 5 years of experience with the ability to read and locate information on blueprints, floor plans, or schematics. Having OSHA 10 and/or confined space training are your value-add, with BICSI certification or International Firestop Counsel certification putting you ahead of some learning curves.

**Arcomm keeps people connected. We keep employees connected through the right fit.**

We want to hear from you. Bring your curious mind, good work ethics, and send your resume so we can connect!

Relocation assistance or work sponsorship is not available. Applicants only, please. Kindly do not contact us with unsolicited services or offers.  
Thank you.
