Telephone Systems Installation, Telecom Technician

Located in Hillsboro, NH, Arcomm Communications is a diversified telecommunications company that has been in business for over 35 years. We have several full-time telecommunication openings available with pay matching experience.

Upon eligibility, benefits include 3 group health insurance plans to choose from, paid long-term disability insurance, voluntary short-term disability insurance, voluntary dental insurance, 8 paid holidays (including a birthday floater to celebrate you!), paid sick days, paid vacation, safety shoe reimbursement, Rx safety glasses reimbursement, annual tool allowance, company logo-wear, retirement plan, breakfast/lunch-and-learn sessions, as applicable a company vehicle, and a safety-first internal culture.

Your transferrable skillsets might include familiarity with telecommunications equipment and/or telephone systems-telephone technology, Session Initiated Protocol, data, voice, and fiber optic cabling, IT experience, low voltage experience, carpentry skills, locksmithing, soft skills, a good work ethic, and a desire to learn.

Your tool kit may include a butt-set, electrical snips, fish sticks, fish tape, cordless drill, tone set, volt-meter, punch down tool, and screwdrivers.

Our most immediate need is for an experienced Senior Telecommunications Technician. For this opportunity, you might:

- Conduct site surveys and meet with other department heads to plan and coordinate telecommunications systems
- Plan telecom installations by studying customer orders, plans, manuals, and technical specifications; gathering equipment, supplies, materials, and tools, assessing the installation site, and preparing an installation diagram
- Install and repair telephone systems, VoIP, dial tone, PA systems, and peripherals such as hold music, and call accounting systems
- Install, maintain, and repair communication circuits including dial tone, central office trunks, SIP trunks, PRIs, and Key System & PBX stations, while following industry standards
- Install, maintain, and repair wiring/cabling
- Verify service/repair by testing circuits and systems using appropriate diagnostic equipment followed by correcting or escalating the circumstances
- Document system installations by labeling equipment and cables, recording configuration diagrams and specifications, and creating and storing database backups

Arcomm keeps people connected. We keep employees connected through the right fit.

We want to hear from you. Bring your curious mind, good work ethics, and send your resume so we can connect!

Relocation assistance or work sponsorship is not available. Applicants only, please. Kindly do not contact us with unsolicited services or offers. Thank you.
